27 June 1892.

Dear Professor Erman,

I am very much obliged to you for your note on [illegible]: it certainly comes very near to a proof of the value ṯa and will justify me in dropping our long-used ta (dz).

I have just learnt that Mr. Thompson (maunde-) in conjunction with Budge, who is now practically head of the Egyptian department, is ~~settling~~ arranging for a series of publications of papyri etc. and

that consequently a large part of the Brit. Mus. collection is now reserved. So if any of your friends are contemplating a visit to the Museum for the purpose of studying the antiquities and papyri it would be well to write to Budge or W. Thompson beforehand. It is possible that one would be allowed to study a document if he undertook not to publish it: this I do not know. I just mention this as it may prevent disappointment. It will

be a very good thing to have a series of museum publications in the best style.

I have found [illegible] among some metals in the Kahun papyri. I really hope to begin publication this summer!

Yours very truly

F. L. Griffith.
