11, NORHAM GARDENS,
OXFORD.

21 Dec. 1913.

Dear Professor Erman,

Many thanks for your kind letter and the interesting information which you give me about your early researches into Merotic, when the material was so scanty. It shows what insight can do without any obvious guidance. I wish you would apply that insight to the Merotic problem in its present stage! I am preparing the Faras inscriptions for publication, but cannot get

any further with the language, except
that I think / must be the missing
o vowel in spite of АГМННУГ etc.

Yesterday I send back the last proof
of the Christian Nubian texts. There
have been a good many delays
on account of insufficient small
type for printing the Indices: and
I fear my corrections have been heavy
in spite of your warning and the
revision which followed.

Yours very truly

J. H. Siffert
